Experienced Frontend Developer specializing in modern JavaScript/TypeScript frameworks with a strong background in game development (Unity C#).

## WORK EXPERIENCE

### Frontend Developer | PT. Lumintu Logic Indonesia

*(Jan 2024 – Present)*

- Developed responsive web applications using Astro.js, improving page load speed compared to previous implementation.
- Collaborated with designers, backend developers, and QA engineers to deliver production-ready websites.
- Integrated REST APIs and ensured smooth functionality across devices and browsers.

### Frontend Developer | Artajasa

*(Aug 2023 – Dec 2023)*

- Built and maintained three corporate websites ([artajasa.co.id](https://artajasa.co.id), [atmbersama.com](https://atmbersama.com), [bersama.id](https://bersama.id)) based on Figma designs.
- Utilized Next.js, TypeScript, and SCSS for high-performance and maintainable frontend development.
- Integrated data from Laravel + Voyager CMS into the frontend.
- Implemented efficient data fetching using SWR
- Worked in a team of 3 developers using Git/GitHub for version control.

### Frontend Developer | Spectator

*(May 2023 – Aug 2023)*

- Designed and implemented user interfaces for an online coding exam platform using Next.js and Tailwind CSS.
- Integrated SignalR for real-time communication, enabling instant delivery of questions and code compilation results.
- Managed global application state with Redux Toolkit and stored user sessions in localStorage.
- Implemented integrated Piston API to run and compile user-submitted code in multiple languages (C/C++, Java, Python, etc.), improving platform functionality and user engagement.

## SKILL

- Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript
- Frameworks & Libraries: Next.js, React.js, Astro.js, Tailwind CSS, Redux Toolkit, Zustand
- Tools & Platforms: Git, GitHub, Figma

## EDUCATION

- **Universitas Amikom Yogyakarta** - Teknologi Informasi (2022 - Present)
- **SMK YPKK 1 Sleman** - Rekayasa Perangkat Lunak (2019 - 2022)
